

Acquisition Brief — BiosphereSolvency.com

Asset Offered

- Domain name: BiosphereSolvency.com (.com, exact-match)
- Nature: descriptive digital asset, designed as a neutral banner for the concept of “biosphere solvency”: the capacity of a company, portfolio or territory to remain solvent under biosphere-related stresses (ecosystem degradation, loss of regenerative capacity, disruption of biogeochemical cycles, collapse of key ecosystem services, climate–nature feedbacks).

Not included:

- No advisory, no rating, no audit or consulting services.
- No credit opinion, no official label, no certified methodology.
- No software, no database, no proprietary model or tool.

1. Purpose of this document

This brief is intended for a decision-making group (CEO, CRO, CFO, CSO, Risk, ESG/Climate, Legal, ORSA/ICAAP) that needs to assess:

- what BiosphereSolvency.com actually is,
- how it can serve as a global banner for a “biosphere & solvency” framework,
- how it can be used in stress-testing, risk governance and sustainable finance,
- whether securing the semantic monopoly on “Biosphere Solvency” is strategically relevant,
- how an acquisition process can be run in a simple, secure and institution-grade way.

This document is not an investment recommendation, not a regulated document, and not a credit, legal or supervisory opinion.

2. What BiosphereSolvency.com is / is not

2.1 Definition

BiosphereSolvency.com is a .com domain designed to carry the concept of **biosphere solvency**, understood as:

The capacity of a company, portfolio or territory to remain solvent, operational and financeable as critical functions of the biosphere degrade (soils, water cycles, biodiversity, productivity of ecosystems, climate regulation, pollination, forest cover, ocean health, etc.).

The domain is conceived as a **neutral banner** for:

- biosphere-solvency stress-test frameworks,
- indices, indicators and dashboards linking biosphere health to solvency,
- data and scenario platforms focused on biosphere–finance interactions,
- group-wide “Biosphere Solvency Frameworks” at bank, insurer, asset manager or corporate level,
- observatories, research alliances and blended-finance initiatives around biosphere risks.

2.2 What BiosphereSolvency.com is not

BiosphereSolvency.com is not:

- a rating agency,
- a regulator or supervisory authority,
- an official standard, label or certification,
- a guarantee of compliance with any regulation or framework,
- an investment product, portfolio, fund or financial instrument.

The seller does not provide any regulated service (investment advice, credit rating, asset management, legal or regulatory counsel) through this domain.

The buyer remains solely responsible for:

- the content published under BiosphereSolvency.com,
 - the models, tools and methodologies used,
 - compliance with all applicable laws, regulations and supervisory expectations.
-

3. Who BiosphereSolvency.com is for

Financial institutions

- Banks (ICAAP, credit portfolios, project finance, nature-related risks).
- Insurers and reinsurers (ORSA, physical and nature-related risks).
- Asset managers and asset owners (biodiversity- and nature-related financial risks).
- Infrastructure and transition funds with strong exposure to land, water, biomass and ecosystems.

Real-economy corporates highly dependent on the biosphere

- Agriculture, food & beverages, fisheries, forestry, pulp & paper.
- Natural materials, mining with ecosystem dependencies, bio-based materials.
- Pharma and biotech relying on natural molecules and compounds.
- Cosmetics, luxury, tourism, regions relying on ecosystem quality and landscape.
- Utilities and industries exposed to soil, water, biomass and ecosystem stability.

Public institutions and coalitions

- Central banks, supervisors and public development banks exploring nature-related financial risks.
- Ministries of environment, agriculture, climate, finance, economy.
- International organizations and coalitions around nature, climate and finance.
- TNFD-related initiatives, science–policy platforms, research consortia.

Typical internal sponsor

- CRO, CFO, CSO, Head of Climate/Nature Risk, Head of ICAAP/ORSA, Head of Sustainable Finance, Head of Risk Modelling or Scenario Analysis.
-

4. Why BiosphereSolvency.com matters (2025–2035)

4.1 Nature and biosphere risks become prudential topics

Scientific and policy communities increasingly converge on the idea that **biosphere degradation is a systemic financial risk:**

- over 50% of global GDP is estimated to depend directly or indirectly on ecosystem services,
- degradation of soils, water cycles, pollination, forests and ocean productivity drives physical and transition risks,
- climate–nature feedbacks amplify both climate risk and resource constraints.

In this context, “biosphere solvency” is an emerging lens to organise discussions between science, finance and policy around solvency and capital.

4.2 Regulatory and market pressure

Between 2025 and 2035, nature- and biosphere-related frameworks (TNFD, SBTN, CSRD/ESRS, sectoral laws on deforestation, soils, water, fisheries, land use) are expected to expand and tighten. Boards, regulators and investors need **simple, robust language** to link these themes to solvency and financial soundness.

4.3 Biosphere shocks as solvency shocks

Biosphere shocks can translate into:

- productivity losses (agriculture, forestry, fisheries),
- resource constraints (water, biomass, natural inputs),
- operational disruptions (fires, landslides, erosion),
- higher CAPEX for adaptation and remediation,
- higher insurance and capital costs.

For many sectors, the biosphere moves from “ESG externality” to **core business continuity and solvency factor**.

4.4 Why an exact-match .com matters

- “Biosphere Solvency” is an intuitively understandable phrase linking Earth system health and solvency.
 - Controlling the exact-match .com is a **defensive semantic asset** if the concept spreads.
 - It allows one actor (or consortium) to anchor its frameworks, platforms and narratives under a unique, globally readable banner.
-

5. Illustrative use cases (non-binding examples)

The examples below are purely illustrative. They are not recommendations and do not bind the seller.

Case A — Group “Biosphere Solvency Framework” (bank, insurer, asset owner)

- Develop and publish a group-level framework for biosphere-related solvency risks.
- Integrate biosphere stress scenarios into ICAAP/ORSA, climate and nature risk processes.
- Produce “Biosphere Solvency” dashboards for the Board and Risk Committee (exposure by sector, geography, ecosystem dependency).

Potential benefits (illustrative):

- clearer narrative for supervisors and investors,
- better alignment between risk, ESG, business and capital allocation,
- increased credibility in nature/climate engagements.

Case B — Data & scenario platform “Biosphere Solvency”

- Use BiosphereSolvency.com as the neutral façade for a data and scenario platform linking biosphere indicators and financial metrics.
- Provide APIs, dashboards and scenario packs to financial institutions, corporates and public authorities.
- Host guidance, methodological notes and case studies under a single, recognisable banner.

Case C — International observatory “Biosphere Solvency”

- Build an observatory or think tank measuring biosphere–solvency interactions across countries, sectors or regions.
 - Publish indices, maps and periodic reports on biosphere-related solvency risks.
 - Convene scientific, financial and policy communities around a clear, neutral brand.
-

6. Related assets and possible “Solvency” family positioning

BiosphereSolvency.com can, if desired by the buyer, be combined with other “Solvency” assets to form a broader framework (for example around water, energy, climate, nature, tech/compute).

Such combinations are not included by default and would need to be negotiated separately. No exclusivity, bundle or additional right is implied beyond the domain BiosphereSolvency.com itself.

7. Legal framework & responsibilities

- The seller transfers **only** the domain name BiosphereSolvency.com.
- No method, model, dataset, software, brand, trademark, rating, label, certificate or licence is transferred.
- No regulated service is provided through this brief or through the sale of the domain.
- All examples, figures and scenarios mentioned are **illustrative** and non-binding.

The buyer is solely responsible for:

- the design of any method, model, index, score or scenario,
- the contents and claims made under BiosphereSolvency.com,
- the assessment and management of legal, regulatory, accounting, tax and prudential

implications,

- the need to seek its own legal, regulatory, risk, accounting and tax advice.

This document does **not** constitute:

- an offer of financial products or services,
 - investment advice,
 - a credit rating or credit opinion,
 - a legal or regulatory opinion,
 - a certification of compliance with any framework (TNFD, SBTN, CSRD/ESRS, etc.).
-

8. Indicative acquisition process

A typical process, adaptable to the buyer's internal requirements, may follow these steps:

1. Initial contact & NDA
 - Confidential contact via contact@biospheresolvency.com.
 - Option to sign a bilateral non-disclosure agreement.
 2. Strategic discussions
 - Clarify intended uses (framework, platform, observatory, alliance).
 - Discuss potential articulation with other risk, climate and nature initiatives.
 3. Formal offer
 - Written proposal outlining scope (BiosphereSolvency.com only, or combined with other domains if agreed), price, conditions, timeline.
 4. Escrow setup
 - Use of a recognised domain-name escrow service to secure payment and transfer.
 5. Domain transfer
 - Change of registrant/registrar according to market practice.
 6. Closing & communication
 - Optional public communication about the acquisition, or strict confidentiality at the buyer's discretion.
-

9. Contact

- Domain: <https://www.biospheresolvency.com>
- Email: contact@biospheresolvency.com
- LinkedIn: <https://www.linkedin.com/company/biospheresolvency>

BiosphereSolvency.com is a premium descriptive digital asset, available for acquisition by organisations wishing to structure and lead the narrative “biosphere & solvency” at the scale of their portfolios, sectors or territories, within their own legal and regulatory frameworks.
